SALMON PDRN + TRIPLE PEPTIDE SERUM

A science-inspired skincare story. A prestige-worthy formula. An opportunity for your brand.

MEET PDRN: POLYDEOXYRIBONUCLEOTIDE

PDRN—short for polydeoxyribonucleotide—is a collection of purified DNA fragments that can be sourced from salmon. First studied in medical and regenerative research, salmon-derived PDRN has become a standout ingredient in Korean-inspired skincare. Its appeal is simple: a distinctive origin, a science-led story, and a compelling new way for beauty brands to speak about skin appearance and care.

NOT JUST ANOTHER PDRN SERUM.

Royal Labs pairs salmon-derived PDRN with a sophisticated supporting complex designed for a premium daily skincare ritual. Three signal peptides complement ectoin, niacinamide, panthenol and multi-weight hyaluronic acid—bringing together ingredients associated with hydration, conditioning and a smoother, more supple-looking complexion.

THE FORMULA STORY

SALMON-DERIVED PDRN	The signature ingredient behind a high-interest, science-inspired beauty narrative. We use pure salmon at 2% active.
THREE ADVANCED PEPTIDES	Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7 and Palmitoyl Pentapeptide-4 for a sophisticated age-defying positioning.
ECTOIN + NIACINAMIDE	A modern pairing for skin conditioning and a more even, healthy-looking appearance.
HYALURONIC ACID + PANTHENOL	Moisture-focused ingredients that support a plump, soft, hydrated skin feel.
VITAMIN B6	A complementary addition to the multi-active formulation.

YOUR NEXT HERO SKU STARTS HERE.

Give your customers a product with a story worth discovering—and a formulation they can make part of their everyday routine. Available for private-label and custom brand programs through Royal Labs, a family-owned cosmetic manufacturer with more than four decades of experience.
